Lifted Logic

(2023-current)

WEB DEVELOPER

Developed and maintained responsive websites using HTML, CSS, and JavaScript.

Collaborated with designers to implement website layouts and user interfaces.

Migrated legacy websites from older technologies/frameworks to modern platforms.

Integrated third-party APIs for enhanced functionality on web applications.

Implemented SEO best practices to improve website visibility in search engine results.

Troubleshoot and debugged issues with existing websites, ensuring smooth functionality.

Gravitational Marketing

(2018-2022)

FULL STACK DEVELOPER

Refactored and implemented new features for both internal and client-facing products, primarily using the LAMP stack, enhancing functionality and user experience.

Maintained and oversaw 30+ client websites, strategically migrating the platform to AWS. Resulted in reduced overall costs and significantly improved efficiency in developing and deploying new features across all sites.

Led the conceptualization and creation of wireframes and interactive prototypes for a comprehensive frontend redesign of the company's primary software service, enhancing usability and visual appeal.

Managed servers and databases for all company products, ensuring seamless operations. Proficiently handled network concerns and executed complex SQL queries for analytical reporting purposes, ensuring data accuracy and accessibility.

About Me

I make things on the internet. I am a creative and detail-oriented developer/designer with a passion for turning clean, functional code into beautiful, intuitive experiences. Skilled in a variety of web and software development technologies, I am always looking for new challenges and opportunities to grow.

I thrive on the collaborative nature of people and technology, and my personal mission is to explore creative avenues to solve problems while leaving a positive impact on the lives of those around me.
